SÜLEYMAN DEMİREL FEN LİSESİ

the school

Edirne Süleyman Demirel Lisesi, located in Edirne, is a co-ed secondary school which has currently 385 students from 9th grade to 12th grade. It's a science high school where students are helped to get higher education in the fields of medicine and engineering. There is a school dormitory that provides accommodation for the students from cities outside Edirne.

Edirne

Edirne, formerly Adrianople, is in the Turkish region of East Thrace. Close to its borders with Greece and Bulgaria, it was the 3rd capital city of the Ottoman Empire. The city is famed for its many mosques, and minarets. It contains the ruins of the ancient palace of the Ottoman Sultans and the Selimiye Mosque. The city's estimated population is about 139,000.

the task

The 7th IPM Meeting took place in Edirne from the 14th to the 16th of May 2014. The topic was Nature and Environment. The main task of students started previously in their schools, where they designed dresses and fashion accessories using recycled materials. They showed them in an performance full of values about environment and the future.

I have enjoyed myself and learnt a lot in these three days. I would like to extend the meeting!

(student)

We are sure that this kind of work and these meetings are so important for our kids as any other subject.

(parents)

It's important to show our students that each culture, and each language are different ways to understand the same world.
